

Gauge Clusters Installed for NEXRAD product QC

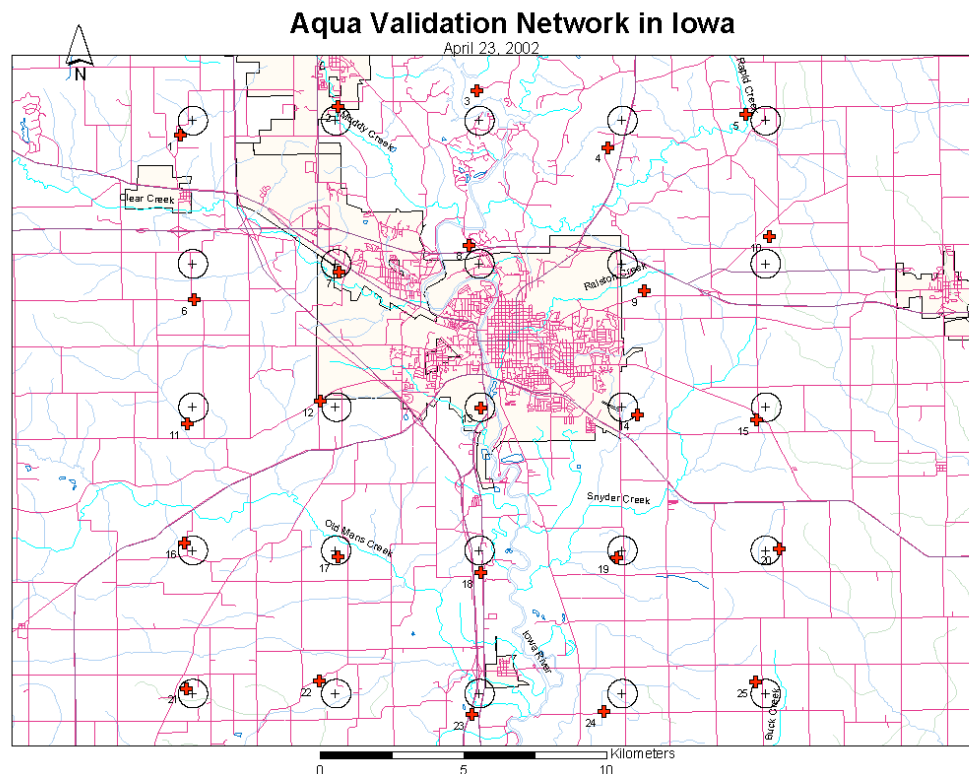

AMSR-E Rainfall Validation - Iowa City, IA

Primary Objectives:

- Install & maintain dense network (25 gauges @ 5 km spacing) of high quality gauges to:
 - Assess rainfall spatial & temporal variability at scales comparable to a satellite FOV.
 - Obtain ground rainfall estimates with low sampling error & develop accurate error models

Status:

- Gauges installed in summer of 2002; data collection began in August 2002
- Relational database with web access under development and undergoing initial test phase
